Course Description: This course trains emergency response supervisors and managers in the skills necessary to effectively plan for and manage a WMD (CBRNE)/terrorism incident by applying the all-hazards command and management structures found in the National Incident Management System—specifically, the Incident Command System (ICS), Multi-Agency Coordination Systems, and Public Information Systems. The IM/UC (MGT 313) course complies with the NIMS National Standard Curriculum Training Development Guidance, of October 2005, and has been deemed to be both “ICS 300 compliant and equivalent training” by the DHS Office of Grants and Training (G&T) in conjunction with the DHS NIMS Integration Center (NIC).

Course Description Continued:

The course uses a multidiscipline, jurisdictional “teambuilding” approach to accomplish the learning objectives. The course consists of lectures, small group discussions and activities, multimedia scenarios, and a tabletop exercise. Upon course completion, participants will possess a working knowledge of local, state, and federal agency roles and responsibilities and their integration into a unified command for managing terrorism and WMD (CBRNE) incidents, as well as other incidents of national significance.

Course Delivery: National Emergency Response & Rescue Training Center, Texas Engineering Extension Service
