SCEIG is....

...an association of state, federal, local, educational and service agencies designed to help small communities in meeting their environmental infrastructure needs.

***SCEIG was
formed in 1990...***

...these agencies saw a need to coordinate efforts to assist small governments with the difficult task of **developing, improving, and maintaining** their water and wastewater systems.

SCEIG goal is...

...to assist small communities in identifying the most **appropriate resources** to help the communities **resolve problems** associated with environmental infrastructure.

Finance Committee

- shares information and ideas to get a complete picture of the **communities situation** and **makes recommendations** and continues to **work with** the community to obtain whatever **financial assistance** is available.

Finance Committee

- has developed a **Funding Sources Grid** for local communities to use as a resource.
- need to submit **Community Project Profile** to get on the agenda.

Finance Committee
